### EXPLANATIONS.

**All the Maps and Atlases** except those printed under the line "Issued by Other Publishers" are our own publications. If any map or atlas is wanted which is not mentioned in this catalogue we shall be pleased to supply it at the lowest price.

**Any of the Maps** will be supplied "dissected" if desired in that form. This will add 75 cents to the price of the pocket maps. The dissected maps have their paper sheets cut in small squares and pasted on muslin with narrow spaces between them, so that, while they make a complete map when opened, they may be readily folded into a small space.

**Map Cases and Spring Rollers** supplied in any size at lowest rates.

**The Pocket Maps** are printed on thin, tough paper, manufactured especially for the purpose, and folded into covers, the proper size to carry in the pocket.

**The Sizes are in Inches** unless otherwise specified. The first figures give the size from top to bottom; the second, from side to side.

**All the Maps and Atlases** have been compiled, engraved and printed in our lithographic establishment. Our facilities for this kind of work are unsurpassed.

**Special Maps** engraved and printed promptly and at reasonable prices.

**Orders** for mounting maps and old documents solicited.

**Automobile Map, Adirondack Region, South Part, New York**

These sectional maps show the roads, railroads, streams, ponds, churches, school-houses, cemeteries, etc., etc. The road names are given and the quality of each for driving clearly indicated. At each crossing of the railroad by a public road it is shown whether it is a grade crossing or an overhead or underneath bridge. The elevations are given by buff contour lines at every one hundredth foot elevation. The contour in the water along the shore indicates eighteen feet depth at low tide. There is a street plan of each city, revised by the city engineer or some prominent local civil engineer. The index map of the State shows the division of the State into the plates and gives the page number of each. The index includes every name on the maps, so there need be no vexatious delays in finding any brook or post-office. Bound either in board covers or in flexible leather cover, from which any sheet can be taken. Price, $25.

## New Guide to Metropolitan Boston

The "Guide to Metropolitan Boston," which Walker Lith. and Pub. Co. have just published, is crammed full of facts worth knowing about all parts of the city. It describes and locates places of historic interest, and gives an outline of the important events and the memorable incidents connected with every spot of ground in the city. All the important buildings are described, with the date of their construction and other details; and the parks and parkways, the harbor, the park system, and the suburbs in all directions are described with sufficient fulness to enable the visitor from another city to know where everything is that is worth seeing. The book is equipped with a new map of Boston, showing all points of interest, hotels, theatres, and public buildings, and it is full of excellent half-tones of important public buildings and other views that are worth preserving. It is a thoroughly practical and concise pocket guide. — Boston Herald.
